

Compute is all you need

Chart of the week: Vertiv's data center power and cooling equipment TAM

Just as we were (anecdotally) starting to see some profit taking in AI winners early last week, Nvidia's results on Wednesday served as a useful reminder of the still healthy opportunity ahead for AI compute. Nvidia's revenues for its fiscal Q1 ending in April grew by 85% YoY to \$82bn (3% ahead of consensus), while the mid-point of the FQ2 guidance implied revenues would almost double YoY to \$91bn (5% ahead of consensus). CEO Jensen Huang noted growing demand from hyperscalers, but also from AI native cloud providers, as well as enterprise and sovereign customers. Agentic AI applications are accelerating, while physical AI remains a large future opportunity. US data center power and cooling equipment peer Vertiv hosted an investor day last week and echoed similar sentiments on the demand environment. Vertiv sizes up its data center TAM at nearly \$50bn, which it expects to grow at an 18-20% CAGR through 2030, driven by cloud & colocation at 23-25%.

就像我们（凭经验）开始看到AI领跑者早前出现一些获利了结 上周， Nvidia周三公布的财报已充分提醒，AI计算领域仍存在 可观机遇。 Nvidia截至4月的第一财季营收同比增长85%，至820亿美元（较市场共识高出3%）； 第二财季（FQ2）指引中点显示， 营收将同比几乎翻倍，达910亿美元（较市场共识高出5%）。首席执行官 Jensen Huang指出，超大规模数据中心运营商（hyperscalers）、原生AI云服务商、企业及主权客户的需求均在增长。Agentic AI应用正在加速推进， 而实体AI仍是未来的重大机遇。美国数据中心电力及冷却设备同行Vertiv上周举办了投资者日， 在需求环境方面表达了类似观点。Vertiv将其数据中心总可寻址市场（TAM）估为近500亿美元，预计2030年前将以18-20%的复合年增长率（CAGR）增长，其增长由占比 23-25%的云和托管服务（colocation）驱动。

Vertiv projects 140GW of new data center capacity will be added over the next 5 years (up from 100GW previously), with 20-35GW added annually, limited by factors such as power availability, permitting and labour. It also expects its data center content opportunity to continue to grow, at \$3.25-3.75m per MW, up 10-15% versus the prior range. Overall, the company now targets 20-22% organic revenue CAGR over 2025-2030 (up from 12-14% over 2024-2029 previously) with a margin of 27% in 2030 (versus a target of 25% for 2029 previously and its 2026 guidance of around 23.3%). The read-across is positive for EU data center exposed names such as Schneider, Siemens Energy, ABB, Legrand, Siemens AG, and Prysmian.

Last week

Prysmian's Japanese optical fiber peer **Fujikura's** shares were down 17% on Tuesday after having announced new mid-term targets. The company is targeting operating profits of JPY315bn for FY28 vs. consensus JPY455bn. Notably, Fujikura does not have meaningful domestic bare fiber capacity in the US, and had recently announced plans to expand its optical fiber footprint in the US, which only ramps up from 2030. In addition to Fujikura, **Furukawa** announced FY28 targets and presented a 2030 plan. Furukawa sees sales in its optical solutions business growing at a 15% CAGR (FY25-FY28). But optical fiber capacity investments are seen benefiting the group only gradually from FY28 onwards, while the company leans conservative on pricing sustainability in the short term. Importantly, Furukawa has not yet announced fiber capacity investments. The company is primarily expanding downstream cable capacity and reallocating existing fiber internally, while considering, but not yet committing to future fiber expansion.

On Thursday, we hosted a roadshow with Maria Ferraro, CFO of **Siemens Energy**, and Tobias Hang, head of IR. We believe that investors' concerns regarding a possible peak in Gas GW orders ignore the expected step-up in aftermarket revenue from FY30 onwards and the structural growth dynamics of the Grid business. Following the group investor meeting organized with the **Weir** management, we find that while the structural drivers for mining growth remain intact with supportive commodity prices in key hard-rock exposures, order growth at Weir has fallen behind that of peer companies recently.

On the macro side, the provisional May manufacturing PMI for the Eurozone came in at 51.4 (vs. 51.8 consensus) from 52.2 in April. Germany's PMI was 49.9 (vs. 51.0 consensus) from 51.4, and France's was 48.9 (vs. 52.1 consensus) from 52.8. Germany's IFO business expectations index for May increased to 83.8 (vs. 83.5 consensus) from 83.3 in April, and its PPI for April increased +1.7% YoY (vs. consensus: +1.5%, March: -0.2%). France's manufacturing confidence index for May improved to 102 (vs. consensus: 99) from 100 in April. For April, US housing starts declined to 1.465 million (vs. 1.410 million consensus) from 1.502 million in March, while the provisional Building permits data increased to 1.442 million (vs. 1.384 million consensus) from 1.363 million in March. China's industrial production growth decelerated to +4.1% YoY in April (vs. +6.0% consensus, March: +5.7%).

This week

On the macro front, key releases this week include US - Dallas Fed Manufacturing Activity (May) on Tuesday, US - Richmond Fed Manufacturing Index (May), Italy - Industrial Sales (Mar), and China - Industrial Profits (Apr) on Wednesday, France - PPI (Apr), Italy - PPI (Apr), and Italy - Manufacturing Confidence (May) on Thursday, followed by US - Wholesale Inventories (Apr P), and US - Building Permits (Apr F) on Friday. A full schedule is shown below.

维谛技术（Vertiv）预计未来5年将新增140GW的数据中心容量（此前为100GW），每年新增20-35GW，受电力供应、审批和劳动力等因素限制。该公司还预计其数据中心内容市场机会将持续增长，每兆瓦的机会价值为325-375万美元，较之前的区间增长10-15%。总体而言，该公司现在目标是2025-2030年的有机收入复合年增长率为20-22%（此前为2024-2029年的12-14%），2030年利润率为27%（此前2029年目标为25%，2026年指引约为23.3%）。对欧盟数据中心相关公司如Schneider、Siemens Energy、ABB、Legrand、Siemens AG及Prysmian来说，这一影响是积极的。

上周

普睿司曼（Prysmian）的日本光纤竞争对手藤仓（Fujikura）周二在公布新的中期目标后股价下跌17%。该公司目标财年2028（FY28）的营业利润为3.15万亿日元，而市场预期为4.55万亿日元。值得注意的是，藤仓在美国没有有意义的国内裸纤产能，最近宣布计划扩大其在美国的光纤布局，产能将于2030年起逐步提升。除藤仓外，古河电工（Furukawa）也公布了财年2028目标并提出了2030年规划。古河电工预计其光纤解决方案业务的销售额将以15%的复合年增长率（CAGR，财年25-28）增长。但光纤产能投资预计将从财年28开始逐步惠及集团，而公司在短期定价可持续性方面保持保守态度。重要的是，古河电工尚未宣布光纤产能投资。该公司主要在扩大下游电缆产能并在内部重新分配现有光纤，同时正在考虑但尚未承诺未来的光纤扩张。

周四，我们与Maria Ferraro（**Siemens Energy**）首席财务官、投资者关系（IR）主管Tobias Hang共同举办了一场路演。我们认为，投资者对天然气GW订单可能见顶的担忧，忽略了FY30起售后市场营收的预期提升以及电网业务的结构增长动力。在与**Weir** 管理层共同组织集团投资者会议后，我们发现，尽管关键硬岩领域的大宗商品价格支撑使矿业增长的结构驱动因素保持完好，但Weir的订单增长近期已落后于同行公司。

宏观方面，欧元区5月制造业PMI初值为51.4（一致预期51.8，4月为52.2）。德国PMI为49.9（一致预期51.0，4月为51.4），法国PMI为48.9（一致预期52.1，4月为52.8）。德国5月IFO商业预期指数升至83.8（一致预期83.5，4月为83.3），4月PPI同比上升+1.7%（一致预期：+1.5%，3月：-0.2%）。法国5月制造业信心指数回升至102（一致预期99，4月为100）。4月美国新屋开工降至146.5万户（一致预期141万户，3月为150.2万户），而成屋许可初值升至144.2万户（一致预期138.4万户，3月为136.3万户）。中国4月工业增加值同比增速放缓至+4.1%（一致预期+6.0%，3月+5.7%）。

Reports you might have missed

Siemens Energy: Feedback from roadshow with CFO: We hosted a roadshow in Paris with Maria Ferraro, CFO of Siemens Energy and Tobias Hang, head of IR. We believe that investors' concerns regarding a possible peak in Gas GW orders ignore the expected step-up in aftermarket revenue from FY30 onwards and the structural growth dynamics of the Grid business. In November, we expect management to increase its share buyback program and guide for a margin range of 18-20% for FY30. In addition, the CFO confirmed that the trademark agreement with Siemens AG will come to an end in the course of 2030, allowing the group to save an incremental 1ppt of margin from 2031 onwards. See full report [here](#).

European Capital Goods: Takeaways from the Q1 earnings season: This report compiles charts and observations from the Q1 earnings season. By geography, we observed sequential improvement in the US and China, partly offset by a deterioration in the Middle East and Latin America. By segment, the datacenter and power sectors continued to deliver the strongest growth rates, while short-cycle industrial businesses improved only modestly in Q1. Despite the conflict in the Middle East, global manufacturing activity accelerated in April, with the aggregate manufacturing PMI up +1.3pts MoM to 52.6. Siemens' automation business also showed stronger growth in April, ahead of the group's internal estimates. Inflation is back, with both global input and output price indices rising to their highest levels since June 2022, reaching 66.3 (vs. 62.3 in March) and 58.0 (vs. 55.1 in March) respectively. Many industrial companies commented that they've been putting through incremental pricing in April to cover rising commodity and energy costs, with the net value gap expected to be positive in H2. Our preferred stocks are Siemens Energy, Schneider, Knorr-Bremse, Prysmian, Nexans, Nordex, Kion, and Sandvik. See full report [here](#).

Siemens AG: A tale of two halves: With the planned de-consolidation of Healthineers (SHL), Siemens will simplify its governance and refocus on a more synergistic and faster-growing portfolio. However, the time-line of the spin is slow and clarification on the tax treatment is still pending. Meanwhile, SHL performance remains a drag on the group's overall results. Mobility's 25% profit miss and the acquisition of Italian rail signaling company Mermec also serve as a reminder that Siemens' portfolio is broader than solely automation and electrification. Indeed, in FQ2, half of the group's portfolio (DI and SI) beat consensus, while the other half (SHL, MO, SFS) missed significantly. With the shares already trading on a 2027 P/E of 21.2x (and 23.5x excluding SHL), we consider Siemens to be fairly valued. With this report, we review the performance and outlook of the group's automation business in detail. See full report [here](#).

Weir: More seasonality to FY26, new TP 3230: We hosted Weir management for a group investor meeting. While structural drivers for mining growth remain intact with supportive commodity prices in key hard-rock exposures, order growth at Weir has fallen behind that of peer companies recently. The company faces tough comps for growth in H1 with the market looking for confirmation that growth will accelerate after a weak Q1 IMS print, making Q2 an important quarter for execution. Given all this information, we expect a more seasonal split on revenues and profits for FY26, weighting towards H2. On a positive note, management continues to execute well against plan in cost-out and with its software assets. The market looks to have already priced in expected weaker near-term growth with the share trading poorly since FY25 results on a relative basis. We adjust our target price to 3230p, a 13% cut vs our previous target price, which still implies significant upside from

西门子能源：与首席财务官（CFO）路演反馈：我们在巴黎与西门子能源首席财务官 Maria Ferraro以及投资者关系（IR）主管Tobias Hang举办了一场路演。我们认为投资者对天然气GW订单可能见顶的担忧忽略了财年2030年后售后市场收入的预期增长，以及电网业务的结构性增长动力。11月，我们预计管理层将增加股票回购计划，并指引财年2030的利润率区间为18-20%。此外，首席财务官确认与西门子股份公司（Siemens AG）的商标协议将在2030年结束，这将使集团从2031年起每年额外提升1个百分点的利润率。完整报告请[点击此处](#)查看。

欧洲资本货物：第一季度财报季要点：本报告汇编了第一季度财报季的图表与观察结果。按地区划分，我们观察到美国的环比改善以及China，部分被中东和拉丁美洲的恶化所抵消。按细分领域划分，数据中心和电力行业持续实现最强劲的增长率，而短期周期工业企业在第一季度仅实现温和改善。尽管中东存在冲突，全球制造业活动在4月有所加速，综合制造业PMI环比上升+1.3点（环比），至52.6。Siemens的自动化业务也在4月展现出更强劲的增长，超出集团内部预期。通胀卷土重来，全球投入与产出价格指数均升至2022年6月以来的最高水平，分别达到66.3（3月为62.3）和58.0（3月为55.1）。许多工业企业表示，他们已在4月持续提价以覆盖不断上涨的大宗商品和能源成本，净价值缺口预计将在上半年转为正。我们偏好的股票包括 Siemens Energy、Schneider、Knorr-Bremse、Prysmian、Nexans、Nordex、Kion及Sandvik。完整报告[请见此处](#)。

西门子AG：两个半数的故事：随着计划中的非合并Healthineers（SHL），西门子将简化其治理架构，并重新聚焦于更协同、增长更快的业务组合。不过，拆分的时间线缓慢，税务处理的细则仍待明确。与此同时，SHL的表现仍拖累集团整体业绩。Mobility业务的利润未达25%的预期，以及对意大利铁路信号公司Mermec的收购也提醒我们，西门子的业务组合不仅限于自动化和电气化领域。事实上，在第二财季（FQ2），集团的一半业务（DI和SI）超出共识预期，另一半（SHL、MO、SFS）则明显不及预期。鉴于该股目前的2027年市盈率为21.2倍（若不含SHL则为23.5倍），我们认为西门子的估值合理。通过本报告，我们将详细分析集团自动化业务的业绩及展望。详见完整报告[此处](#)。

Weir：26财年季节性增强，目标价上调至3230：我们举办了Weir管理层参与的集团投资者会议。尽管矿业增长的结构驱动因素依然存在，关键硬岩领域的商品价格也给予支撑，但Weir近期订单增长落后于同行。该公司面临上半年增长的艰难比较，市场期待在第一季度IMS数据疲软后确认增长将加速，因此第二季度是执行的重要季度。基于所有这些信息，我们预计26财年收入和利润将更具季节性，权重偏向下半年。值得一提的是，管理层继续在成本削减和软件资产方面按计划执行。市场似乎已将近期预期的弱增长定价，自25财年业绩公布以来，该股相对于基准表现不佳。我们将目标价调整至3230便士，较之前目标价下调13%，仍意味着大幅上涨空间。

Nordex Group starts production at new blade manufacturing facility in Türkiye: The Nordex Group has successfully started production at its new blade manufacturing facility in Menemen, İzmir (Türkiye) in May 2026, further strengthening the continuous growing demand for high-efficiency onshore wind turbines in the country. The new site, located in the İzmir Free Trade Zone, covers a total land area of approximately 130,000 square metres, with a production building of around 90,000 square metres. At full capacity, the plant is designed to manufacture up to 1,200 rotor blades per year operating in four shifts, employing around 1,200 people across production and administrative functions. The facility will produce rotor blades for the Nordex Group’s latest turbine types, including the N163 and N175 models. These turbines are specifically designed for medium to strong wind conditions and are key components in delivering high energy yield and efficiency for customers. The plant will initially focus on supplying blades for projects awarded under Türkiye’s YEKA tenders, including the YEKA-4 and YEKA-5 programmes. At the same time, the facility is strategically positioned to supply international markets, with plans to export blades to support European wind energy projects. (Source: Nordex, 22 May 2026)

GE Vernova to acquire Robotech Automation to accelerate robotics and automation capabilities: GE Vernova Inc. announced today the signing of a definitive agreement to acquire Robotech Automation ("Robotech"), a specialized robotics and automation systems integrator based near Montreal, Quebec, Canada, to accelerate its robotics and automation capabilities. Robotech is a private company that employs approximately 35 people and delivers customized automation solutions through a combination of in-house design, engineering, and integration capabilities supported by a network of trusted manufacturing partners. Vestas adds 673 MW to Q2 order intake: Vestas is proud to have received orders for 673 MW in the USA for undisclosed projects. (Source: Vestas, 20 May 2026)

Legrand announces the acquisition of SRS Power Engineering in Malaysia: Legrand is further strengthening its positions in Asia with today’s announcement of the acquisition of SRS Power Engineering in Malaysia, a specialist in low- and medium-voltage power protection solutions, primarily serving data centers and industrial applications. Based in Selangor, the company employs more than 280 people and generates annual revenue of around €90 million. (Source: Legrand, 20 May 2026)

Accelleron Industries AG: Accelleron launches CHF 100 million share buyback program: Accelleron will launch its previously announced share buyback program with a total volume of up to CHF 100 million on May 20, 2026. The program forms part of Accelleron’s balanced and disciplined capital allocation framework. The share buyback program will run from May 20, 2026 to May 19, 2028. Under the program, Accelleron intends to repurchase shares up to a maximum volume of CHF 100 million. Based on the closing price of the registered share on SIX Swiss Exchange on May 15, 2026, this corresponds to a maximum of 1,179,941 registered shares. The maximum number of shares to be repurchased per trading day as well as weekly updates on the progress of the share buyback program will be published on Accelleron’s Investor Relations website. Equity rating dispersion and banking relationships

Equity Rating and Dispersion Key

The Equity Rating Dispersion Chart depicts the following:

The proportion of recommendations that are rated "buy", "sell" and "hold" over the previous 12 months. This is shown for securities issued in the stated region e.g. "Europe Universe". See rating definitions below. This is represented by the "Companies Covered" bars in the chart. The percentage value displayed above the bar is the proportion as a percentage. E.g. 50% above the "buy" / "Companies Covered" bar means that 50% of DB's equity research covered companies over the past 12 months have a "buy" rating.

Next to each of the three respective bars showing the proportion of "buy", "sell" and "hold" recommendations we provide two additional bars to show:

- The proportion of "buy", "sell" or "hold" recommendations where Deutsche Bank and or/Affiliates provided MIFID Investment or Ancillary Services in the past 12 months. This is represented in the "MIFID Investment and Ancillary Services" bar. The percentage value displayed above the bar shows the proportion of Companies Covered with the given rating where DB has also provided MIFID Investment and Ancillary Services in the past 12 months. E.g. 50% above the "Cos. w/ MIFID Investment and Ancillary Services" bar means 50% of the Companies Covered with the rating stated have also received MIFID Investment and Ancillary Services from DB.

- The proportion of "buy" (or "sell" or "hold") recommendations where Deutsche Bank and or/Affiliates has provided Investment Banking services in the past 12 months for which it has received compensation. The percentage value displayed above the bar shows the proportion of Companies Covered with the stated rating where DB has also provided Investment Banking services in the past 12 months. E.g. 50% above the "Cos. w/ Investment Banking relationship" bar means 50% of the Companies Covered with the rating stated also have an Investment Banking Relationship with DB.

Buy: Based on a current 12- month view of TSR, we recommend that investors buy the stock.

Sell: Based on a current 12-month view of TSR, we recommend that investors sell the stock.

Hold: We take a neutral view on the stock 12-months out and, based on this time horizon, do not recommend either a Buy or Sell.

TSR = Total Shareholder Return. Percentage change in share price from current price to projected target price plus projected dividend yield

Newly issued research recommendations and target prices supersede previously published research.

评级分散度与银行关系

股权评级与分散度关键

股票评级离散度图表描绘以下内容：

过去12个月内评级为“买入”、“卖出”及“持有”的推荐比例。该比例显示在所述地区发行的证券（例如“全球股票池”）。见下方评级定义。该比例由图表中的“覆盖公司”条表示。条上方显示的百分比为该比例。例如，“买入”/“覆盖公司”条上方的50%意味着过去12个月内德意志银行股权研究覆盖的公司中有50%为“买入”评级。

在显示“买入”“卖出”和“持有”评级比例的三个条形图旁边，我们提供两个额外的条形图来显示：

- 在过去12个月内，德意志银行和/或附属机构提供了欧盟金融工具市场指令（MIFID）投资或辅助服务的“买入”、“卖出”或“持有”建议的比例。该比例在“MIFID投资及辅助服务”栏中体现。栏上方显示的百分比值表示在过去12个月内，德意志银行也提供了MIFID投资及辅助服务的所评级公司的比例。例如，在“提供MIFID投资及辅助服务的公司”栏上方的50%，表示所提及评级的公司中，有50%也接受了德意志银行提供的MIFID投资及辅助服务。

- 德意志银行及其关联机构提供过投资银行服务并获得报酬的“买入”（或“卖出”或“持有”）评级推荐所占比例（上述服务均为过去12个月内提供并获报酬）。柱状图上方显示的百分比数值，代表了获得给定评级的覆盖公司中，德意志银行也提供过投资银行服务的比例。例如，“存在投资银行关系的公司”柱状图上方标注50%，意味着获得所述评级的覆盖公司中，有50%与德意志银行存在投资银行关系。

Bu：基于当前12个月的总股东回报（TSR），我们建议投资者买入该股。

卖出：基于对TSR的当前12个月展望，我们建议投资者卖出该股。

持有：我们对该股未来12个月持中性观点，基于此时间范围，不建议买入或卖出。

总股东回报（TSR）= 总股东回报，即股价从当前价格到预计目标价格的百分比变动，加上预计股息收益率

Additional Information

The information and opinions in this report were prepared by Deutsche Bank AG or one of its affiliates (collectively 'Deutsche Bank'). Though the information herein is believed to be reliable and has been obtained from public sources believed to be reliable, Deutsche Bank makes no representation as to its accuracy or completeness. Hyperlinks to third-party websites in this report are provided for reader convenience only. Deutsche Bank neither endorses the content nor is responsible for the accuracy or security controls of those websites.

If you use the services of Deutsche Bank in connection with a purchase or sale of a security that is discussed in this report, or is included or discussed in another communication (oral or written) from a Deutsche Bank analyst, Deutsche Bank may act as principal for its own account or as agent for another person.

Deutsche Bank may consider this report in deciding to trade as principal. It may also engage in transactions, for its own account or with customers, in a manner inconsistent with the views taken in this research report. Others within Deutsche Bank, including strategists, sales staff and other analysts, may take views that are inconsistent with those taken in this research report. Deutsche Bank issues a variety of research products, including fundamental analysis, equity-linked analysis, quantitative analysis and trade ideas. Recommendations contained in one type of communication may differ from recommendations contained in others, whether as a result of differing time horizons, methodologies, perspectives or otherwise. Deutsche Bank and/or its affiliates may also be holding debt or equity securities of the issuers it writes on. Analysts are paid in part based on the profitability of Deutsche Bank AG and its affiliates, which includes investment banking, trading and principal trading revenues.

Opinions, estimates and projections constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Deutsche Bank and are subject to change without notice. Deutsche Bank provides liquidity for buyers and sellers of securities issued by the companies it covers. Deutsche Bank research analysts sometimes have shorter-term trade ideas that may be inconsistent with Deutsche Bank's existing longer-term ratings. Some trade ideas for equities are listed as Catalyst Calls on the Research Website (<https://research.db.com/Research/>), and can be found on the general coverage list and also on the covered company's page. A Catalyst Call represents a high-conviction belief by an analyst that a stock will outperform or underperform the market and/or a specified sector over a time frame of no less than two weeks and no more than three months. In addition to Catalyst Calls, analysts may occasionally discuss with our clients, and with Deutsche Bank salespersons and traders, trading strategies or ideas that reference catalysts or events that may have a near-term or medium-term impact on the market price of the securities discussed in this report, which impact may be directionally counter to the analysts' current 12-month view of total return or investment return as described herein. Deutsche Bank has no obligation to update, modify or amend this report or to otherwise notify a recipient thereof if an opinion, forecast or estimate changes or becomes inaccurate. Coverage and the frequency of changes in market conditions and in both general and company-specific economic prospects make it difficult to update research at defined intervals. Updates are at the sole discretion of the coverage analyst or of the Research Department Management, and the majority of reports are published at irregular intervals. This report is provided for informational purposes only and does not take into account the particular investment objectives, financial situations, or needs of individual clients. It is not an offer or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Target prices are inherently imprecise and a product of the analyst's judgment. The financial instruments discussed in this report may not be suitable for all investors, and investors must make their own informed investment decisions. Prices and availability of financial instruments are subject to change without notice, and investment transactions can lead to losses as a result of price fluctuations and other factors. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the investment. Past performance is not necessarily indicative of future results. Performance calculations exclude transaction costs, unless otherwise indicated. Unless otherwise indicated, prices are current as of the end of the previous trading session and are sourced from local exchanges via Reuters, Bloomberg and other vendors. Data is also sourced from Deutsche Bank, subject companies, and other parties. Artificial intelligence tools may be used in the preparation of this material, including but not limited to assist in fact-finding, data analysis, pattern recognition, content drafting and editorial corrections pertaining to research material.

Macroeconomic fluctuations often account for most of the risks associated with exposures to instruments that promise to pay fixed or variable interest rates. For an investor who is long fixed-rate instruments (thus receiving these cash flows), increases in interest rates naturally lift the discount factors applied to the expected cash flows and thus cause a loss. The longer the maturity of a certain cash flow and the higher the move in the discount factor, the higher will be the loss. Upside surprises in inflation, fiscal funding needs, and FX depreciation rates are among the most common adverse macroeconomic shocks to receivers. But counterparty exposure, issuer creditworthiness, client segmentation, regulation (including changes in assets holding limits for different types of investors), changes in tax policies, currency convertibility (which may constrain currency conversion, repatriation of profits and/or liquidation of positions), and settlement issues related to local clearing houses are also important risk factors. The sensitivity of fixed-income instruments to macroeconomic shocks may be mitigated by indexing the contracted cash flows to inflation, to FX depreciation, or to specified interest rates - these are common in emerging markets. The index fixings may - by construction - lag or mis-measure the actual move in the underlying variables they are intended to track. The choice of the proper fixing (or metric) is particularly important in swaps markets, where floating coupon rates (i.e., coupons indexed to a typically short-dated interest rate reference index) are exchanged for fixed coupons. Funding in a currency that differs from the currency in which coupons are denominated carries FX risk. Options on swaps (swaptions) the risks typical to options in addition to the risks related to rates movements.

宏观经济波动通常是与承诺支付固定或可变利率的工具相关风险的主要来源。对于持有固定利率工具（因此接收这些现金流）的投资者而言，利率上升自然会增加应用于预期现金流的折现因子，从而导致损失。特定现金流的期限越长，折现因子的变动越大，损失就越大。通胀意外上行、融资需求和外汇贬值率是接收方最常见的不利宏观经济冲击。但交易对手风险、发行人信用质量、客户细分、监管（包括不同类型投资者的资产持有限额变化）、税收政策变化、货币可兑换性（可能限制货币兑换、利润汇回和/或持仓清算）以及与本地清算所相关的结算问题也是重要的风险因素。固定收益工具对宏观经济冲击的敏感性可通过将合同现金流与通胀、外汇贬值或指定利率挂钩来缓解——这些在新兴市场很常见。指数确定通常会滞后或低估其旨在追踪的基础变量的实际变动，这是其固有的特性。在掉期市场中，选择合适的确定（或指标）尤为重要，其中浮动息票率（即与通常短期利率参考指数挂钩的息票）与固定息票进行交换。以不同于息票计价货币的货币融资会带来外汇风险。掉期期权（swaptions）除了利率变动相关的风险外，还具有期权的典型风险。

Derivative transactions involve numerous risks including market, counterparty default and illiquidity risk. The appropriateness of these products for use by investors depends on the investors' own circumstances, including their tax position, their regulatory environment and the nature of their other assets and liabilities; as such, investors should take expert legal and financial advice before entering into any transaction similar to or inspired by the contents of this publication. The risk of loss in futures trading and options, foreign or domestic, can be substantial. As a result of the high degree of leverage obtainable in futures and options trading, losses may be incurred that are greater than the amount of funds initially deposited - up to theoretically unlimited losses. Trading in options involves risk and is not suitable for all investors. Prior to buying or selling an option, investors must review the 'Characteristics and Risks of Standardized Options', at <https://www.theocc.com/company-information/documents-and-archives/options-disclosure-document>. If you are unable to access the website, please contact your Deutsche Bank representative for a copy of this important document.

Participants in foreign exchange transactions may incur risks arising from several factors, including the following: (i) exchange rates can be volatile and are subject to large fluctuations; (ii) the value of currencies may be affected by numerous market factors, including world and national economic, political and regulatory events, events in equity and debt markets and changes in interest rates; and (iii) currencies may be subject to devaluation or government-imposed exchange controls, which could affect the value of the currency. Investors in securities such as ADRs, whose values are affected by the currency of an underlying security, effectively assume currency risk.

Unless governing law provides otherwise, all transactions should be executed through the Deutsche Bank entity in the investor's home jurisdiction. Aside from within this report, important conflict disclosures can also be found at <https://research.db.com/Research/> on each company's research page or under the 'Disclosures' tab. Investors are strongly encouraged to review this information before investing.

research refers to any particular financial product recipients of the research should consider any product disclosure statement, prospectus or other applicable disclosure document before making any decision about whether to acquire the product. In preparing this report, the primary analyst or an individual who assisted in the preparation of this report has likely been in contact with the company that is the subject of this research for confirmation/clarification of data, facts, statements, permission to use company-sourced material in the report, and/or site-visit attendance. Without prior approval from Research Management, analysts may not accept from current or potential Banking clients the costs of travel, accommodations, or other expenses incurred by analysts attending site visits, conferences, social events, and the like. Similarly, without prior approval from Research Management and Anti-Bribery and Corruption ("ABC") team, analysts may not accept perks or other items of value for their personal use from issuers they cover.

Additional information relative to securities, other financial products or issuers discussed in this report is available upon request. This report may not be reproduced, distributed or published without Deutsche Bank's prior written consent.

Backtested, hypothetical or simulated performance results have inherent limitations. Unlike an actual performance record based on trading actual client portfolios, simulated results are achieved by means of the retroactive application of a backtested model itself designed with the benefit of hindsight. Taking into account historical events the backtesting of performance also differs from actual account performance because an actual investment strategy may be adjusted any time, for any reason, including a response to material, economic or market factors. The backtested performance includes hypothetical results that do not reflect the reinvestment of dividends and other earnings or the deduction of advisory fees, brokerage or other commissions, and any other expenses that a client would have paid or actually paid. No representation is made that any trading strategy or account will or is likely to achieve profits or losses similar to those shown. Alternative modeling techniques or assumptions might produce significantly different results and prove to be more appropriate. Past hypothetical backtest results are neither an indicator nor guarantee of future returns. Actual results will vary, perhaps materially, from the analysis.

The method for computing individual E,S,G and composite ESG scores set forth herein is a novel method developed by the Research department within Deutsche Bank AG, computed using a systematic approach without human intervention. Different data providers, market sectors and geographies approach ESG analysis and incorporate the findings in a variety of ways. As such, the ESG scores referred to herein may differ from equivalent ratings developed and implemented by other ESG data providers in the market and may also differ from equivalent ratings developed and implemented by other divisions within the Deutsche Bank Group. Such ESG scores also differ from other ratings and rankings that have historically been applied in research reports published by Deutsche Bank AG. Further, such ESG scores do not represent a formal or official view of Deutsche Bank AG. It should be noted that the decision to incorporate ESG factors into any investment strategy may inhibit the ability to participate in certain investment opportunities that otherwise would be consistent with your investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

研究指任何特定金融产品，研究接收者在决定是否购买该产品前应考虑任何产品披露声明、招股说明书或其他适用披露文件。编制本报告时，主要分析师或协助编制本报告的人员可能已与作为本研究标的的公司联系，以确认/澄清数据、事实、声明，获得在报告中使用公司来源材料的许可和/或参加现场访问。未经研究管理部门批准，分析师不得接受当前或潜在银行业客户承担的分析师参加现场访问、会议、社交活动及类似活动的差旅、住宿或其他费用。同样，未经研究管理部门及反贿赂与反腐败（ABC）团队批准，分析师不得从其覆盖的发行人处接受馈赠或其他有价值的物品供个人使用。

关于本报告中讨论的证券、其他金融产品或发行人的补充信息可应 要求提供。未经德意志银行事先书面许可，不得复制、分发或发布本报告。

回溯测试的、假设的或模拟的业绩结果存在固有局限性。与基于实际客户投资组合交易的实际业绩记录不同，模拟结果是通过回溯应用回溯测试模型本身实现的，该模型是基于事后诸葛亮的视角设计的。考虑到历史事件，业绩的回溯测试与实际账户业绩存在差异，因为实际投资策略可能会随时因任何原因调整，包括对重大、经济或市场因素的反应。回溯测试的业绩包括假设结果，这些结果不反映股息及其他收益的再投资，也不扣除顾问费、经纪佣金或其他佣金，以及客户可能已支付或实际支付的任何其他费用。不保证任何交易策略或账户将或可能实现与所示结果类似的利润或损失。替代建模技术或假设可能产生显著不同的结果，并证明更合适。过去的假设回溯测试结果既不是未来回报的指标也不是保证。实际结果可能与分析有重大差异。

本文所阐述的计算个人环境、社会和治理（ESG）及综合ESG评分的方法是德意志银行AG研究部门开发的新型方法，采用无人工干预的系统化方法计算。不同数据提供商、市场行业和地区处理ESG分析并将结果纳入的方式各异。因此，本文提及的ESG评分可能与市场上其他ESG数据提供商开发和实施的同等评级不同，也可能与德意志银行集团其他部门开发和实施的同等评级不同。此类ESG评分还与德意志银行AG发布的研究报告中历史应用的其他评级和排名不同。此外，此类ESG评分不代表德意志银行AG的正式或官方观点。需注意，将ESG因素纳入任何投资策略的决定可能会限制参与其他情况下符合投资目标和其他主要投资策略的投资机会。主要由可持续投资构成的投资组合的回报可能高于或低于未考虑ESG因素、排除项或其他可持续发展问题的投资组合，且此类投资组合可获得的投资机会可能不同。公司可能在ESG或可持续发展问题的所有方面均未达到高性能标准；也不能保证任何公司在企业责任、可持续发展和/或影响绩效方面符合预期。
